Additional Information

Healing:

Since my training in energy, I have developed my own Sound Healing modality, which incorporates ancient sound healing techniques, Reiki touch, channeled music and toning. This affects deep healing on the physical, mental, spiritual and emotional levels.

As part of the healing practice I believe it is important to:

1. Tune into the client's energetic state and support the natural flow of energy from there
2. Clear blockages, treating the root of an issue as well as the symptom(s), in order to raise the vibrational state of the body
3. Support the client to feel heard, as I believe much of physical discomfort originates in mental and emotional issues.

I use the following Sound Healing Tools: tuning forks (weighted and non-weighted), vocal toning, Chakra chimes, personal channeled music, crystals, and Tibetan singing bowls.

Recent workshops given:

- Opening Your Heart to Love
- The Inner Child at Peace
- Connecting to Your Spirit Guides
- Introduction to Sound Healing
